QA Automation test

Pre Requirements:

Go to www.humanity.com and create new business owner account (your own test account that you'll use for automation).

Tasks:

- Write down all test cases (log cases in doc or excel) for:
  - *Login page*
  - *Add new employee feature* (there are different possibilities how to add a new employee, but you can navigate to Staff module and add new employee clicking on Add Employees button)
- Automate those test cases using any framework/language/tool

Upload your solution on GitHub and provide us a link to your repository.

Good luck!
